PUBLISH DATA TO THE IBM CLOUD

Date	16 November 2022
Team ID	PNT2022TMID36807
Project Name	Real – time River Water Quality Monitoring and Control System
Maximum Marks	4 Marks

You can publish your virtual data to catalogs in Watson™ Knowledge Catalog. An administrator can configure Data Virtualization to automatically publish all virtual objects that are created in the user interface to a configured primary catalog. By publishing your virtual data to a catalog, you can:

- Organize, label, classify, and search for the published data assets with global search.
- Govern the virtual data asset and subject it to data protection rules by enabling policy enforcement in Data
- Navigate to Service settings.
- On the Governance tab, enable the Enforce publishing to a governed catalog option.

A list of governed catalogs that you have Admin access to is shown. You must select a governed catalog as your primary catalog. When you set a primary catalog, all virtualized objects are published to this catalog automatically. The Publish to catalog option is disabled when you review your cart and virtualize tables.

1. On the service menu, click Virtualization > Virtualized data.
2. Select the virtual objects that you want to publish and click Publish to catalog.
3. Continue with the virtualization process
